

Robert Evans - Earley & Associates

INTRODUCTION:

A highly skilled network professional with extensive experience designing and implementing local and wide area network solutions for enterprise size corporations. CCIE™ No. 7998.

EMPLOYMENT HISTORY:

Systems Engineer II

Los Angeles Named Accounts

Cisco Systems, Inc.

Employed: June 2000 – June 2001

- **Supported the system engineering needs for various “Enterprise Clients”** in the greater Los Angeles area. These clients were in the entertainment, hospitality and financial services industries.
- **Drove sales and managed client relationships** at both executive and technical levels.
- **Designed an 1800 site network** to provide high speed internet access for guests and employees of a global hotel chain using Cisco’s Long Reach Ethernet and Broad Band Service Manager. Leveraged the internet to provide VPN access to corporate headquarters for various applications including reservations.
- **Designed LAN infrastructure using Catalyst 6500s** for a major film/television studio replacing their ATM/LANE network. (10,000+ nodes)
- **Designed the Voice over IP LAN network** with Cisco Call Manager and IP Phones for a major entertainment talent agency (400+ nodes).
- Designed numerous other projects with Cisco’s LAN, WAN, VPN, security, wireless, and network management products.
- Extensive experience with TCP/IP, IPX, AppleTalk, SNA, DLSW+, BGP, EIGRP, IGRP, OSPF, RIP, Frame Relay, ATM, Ethernet, Token Ring and many more.

Unit Manager & Senior Network Engineer

Enterprise Network Services

United California Bank (formerly Sanwa Bank California)

Employed: February 1991 – June 2000

- **Supervised and managed a team of network engineers.** Supplementing the bank’s staff were full time contractors from Pacific Bell service provisioning, Cisco Systems Professional Services, Netigy Inc, and NCR. Team size was as many as 14 engineers and interns.
- **Managed a capital budget in excess of \$6 million** for various network projects including the replacement of the banks entire WAN.
- **Implemented the replacement of the entire LAN/WAN network at 120 bank branches** and partner sites throughout the US. Cisco 2500, 3810, 3600, 4000, 7000 series routers, Catalyst 1900, 5000, 6000 and IGX 8400 products were deployed. Frame Relay & ATM topology used.
- **Implemented the replacement of the entire LAN infrastructure** at the banks operation/data center with Catalyst 5000&6000 switches. (1800+ nodes)
- **Implemented the redesign/remodel of the banks Northern California data center.**
- **Implemented and maintained dozens of Novell and Microsoft servers & gateways.**
